Welcome

Welcome to the Garden Centre Marketing Directory, now in eBook form.

Instructions

To navigate geographically

Click on the 'bookmarks' tab from the menu on the left which gives the geographic breakdown.

To navigate to a particular level, e.g. to find a county within a region, or a town within a county, click on the small triangle to the left of the text in the bookmark section.

To navigate by name of business

Click on the 'bookmarks' tab. At the bottom of the list of geographic areas, click on 'index'. This will take you to the index. When you have found the business, choose 'Go to Page' and type in the page you wish to go to.

To select by product type

Choose the 'find' from the view menu and type in the product you wish to search (it should be one of the categories we use, e.g. hardy stock). To find again choose 'find again' from the 'view' menu. The 'find' is very slow and should only be used to find commonly re-occurring words.

To find any text string

You can use the 'find' to find any text string, but beware it is very slow. You can monitor the performance at the bottom of the page.
